**Background**

4-CP, Part 2 instructs County Offices to process and mail FSA-468's in a timely manner after acreage has been determined to ensure that, if a producer requests a remeasurement, evidence of the crop is still available.

Some County Offices have not mailed FSA-468's for crop year 2002 because of incorrect footnotes printed on FSA-468's. Footnotes are incorrect because of changes brought about by the Farm Security and Rural Investment Act of 2002.

#### A

##### **Correcting FSA-468's**

County Offices shall correct and mail 2002 crop year FSA-468's as soon as possible. Correct FSA-468's by lining through:

- footnote 10, a marketing penalty no longer applies to peanuts because of a difference in the reported and determined acreage
  - mailing date and inserting the new mailing date.
- 

#### B

##### **Omitted Footnotes**

There have been questions about the absence of footnotes by program crops when there is a difference between the reported and the determined acreage. The software does not contain a footnote for 2002 program crops or oilseeds.

**Note:** If no footnote is provided, the report is considered acceptable.
